To

Dr. S. Ramakrishnan, M.S.,D.L.O. F.I.C.S
Managing Director
S.R. Hospital & ENT Research Foundation
No.25, A.L.C. Campus
Cuddalore – 607001

Dear Sir,

SUB: Request for Hospital Visit for III- MBBS – Reg.

As a part of the curriculum for MBBS Course, Sri lakshmi Narayana institute of Medical Sciences & Hospital (BIHER) Puducherry, Third year MBBS students have to undergo Hospital Visit requirement. Students will be attending in batches in your esteemed ENT care Research Foundation Hospital.

Hence I kindly request you to grant permission to do the program at your S.R. Hospital & ENT Research Foundation, Cuddalore from Nov 18th, 19th, 20th 2019 in 3 batches. Kindly do the needful.

I am looking forward for your positive reply in this regard.

Thanking You

With regards

Prof.K.BALAGURUNATHAN,M.S
(General surgeon)

SRI LAKSHMI NARAYANA
INSTITUTE OF MEDICAL SCIENCES
OSUDU PONDICHERRY

Students Participation

Date: 09.11.2019

TO:

The Dean,

Sri Lakshmi Narayana Institute of Medical Sciences,

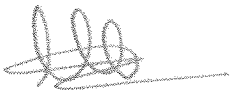

Pondicherry- 605502.

Sir,

With reference to your letter dated 4.11.2019 regarding Hospital Visit for three days in our Hospital, we glad to permit your SLIMS MBBS students to our Hospital from 18th, 19th, 20th November 2019.

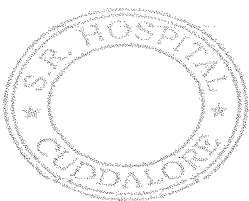

Thanking You,

Wirth regards,

Dr. S. Ramakrishnan

Managing Director

Greetings from S.R Hospital & ENT research foundation, Cuddalore...

At SR ENT Hospital, our mission is to restore balance in every patient's life through unparalleled service, latest technology, procedures and methodologies and our unmatched expertise in the field of ENT medicine. We are constantly on a quest to deliver better services, incorporate evolving technologies and upgrade our skills and knowledge so that we are always at the forefront of ENT service.

Our team is driven to achieve excellence in patient centric, ethical and value based healthcare. When you walk into SR ENT Hospital, you are guaranteed the best service in a caring environment. Walk in with the confidence that your ENT problems will be solved.

Facilities

Hearing loss

Discharge from ears

Rhinoplasty

Headache

Sinus problems

Snoring

Tonsils

Vertigo

Voice clinic

Microscopic ear surgery

The ear has some of the smallest structures in the body that can be operated upon, but this requires magnification.

Tympanoplasty and Mastoidectomy are the middle ear surgeries for ear discharge by closing the hole in the Tympanic membrane with removal of the disease from middle ear and mastoid bone.

Microscopic ear surgery uses a microscope to magnify the internal bones and structures of the middle ear to enable the surgeon to perform corrective surgeries. Our surgeons are highly experienced in

microscopic surgeries and we have the latest equipment and facilities which combine to provide best post surgery results.

Otosclerosis and Stapes surgery

In S. R. ENT Hospital we manage the hearing loss patients with latest equipment and performed in order to improve hearing by Stapes surgery-Stapedectomy.

Endoscopic sinus surgery

With the help of New technology, we treat the patients who are suffering with Headache, Nasal obstruction, and Sinus problem.

We treat sinus problems with FESS- Functional endoscopic Sinus surgery is a minimally invasive surgery used to restore the Sinus ventilations with the latest Endoscopes and Microdebrider.

Sinuses are two in the cheeks, two in the forehead, two exactly in the centre of the head and two between the eyes. An infection in any of these leads to sinusitis.

Endoscopic sinus surgery is performed to widen the drainage channels of the affected sinuses and to relieve congestion. This will promote better drainage of the sinus into the nasal cavity and will help reach medications into the sinus cavity. Endoscopic sinus surgery is a crucial step in the treatment of Chronic rhinosinusitis commonly known as chronic sinusitis.

Our excellent endoscopic surgery services are augmented by effective medical treatments that manage infections and prevent further infections.

Septal surgery

Septum is the wall of bone and cartilage that divides the nose into two nostrils. When the septum is not centrally placed, then it is called a deviated septum.

This can either occur naturally or could be a result of an injury to the nose. A deviated septum will cause pain and breathing difficulty and surgery is the only method of correction.

We offer septal surgery as a day care procedure to correct deviated septum and offer relief from pain and breathing difficulties.

Microsaryngeal surgery

Voice problems rarely require surgery and generally can be treated medically. For removal of abnormal growths in the larynx or voice box surgery is necessary.

With latest and advanced equipments we treat the patients who has Vocal cord polyp, Vocal Nodules causing Hoarseness of voice.

we dealt with Foreign bodies in the upper airway with Advanced methods.

We offer minimally invasive microlaryngeal surgery to correct voice disorders and to diagnose and treat laryngeal cancer.

As it is performed through a laryngoscope there is limited tissue damage so the recovery is quicker than in traditional surgery and is less painful.

This is a day care procedure and the patient can return home the same day.

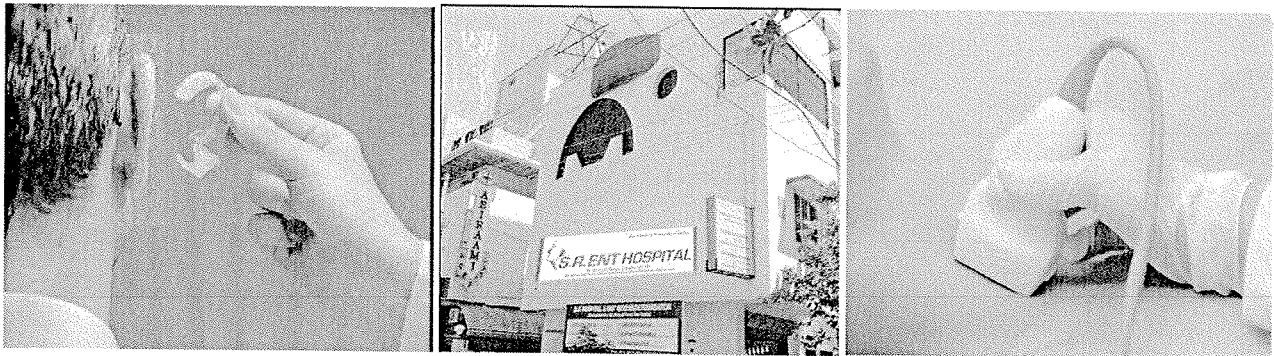

Oral and throat surgery

Voice problems rarely require surgery and generally can be treated medically. For removal of abnormal growths in the larynx or voice box surgery is necessary.

We offer minimally invasive microlaryngeal surgery to correct voice disorders and to diagnose and treat laryngeal cancer.

As it is performed through a laryngoscope there is limited tissue damage so the recovery is quicker than in traditional surgery and is less painful.

This is a day care procedure and the patient can return home the same day.
