CIRCULAR

We are pleased to inform that the School of Basic Sciences is organizing a seminar on “CHO Rich Foods” *in association with M/s. Protein, Chennai* on 22nd February 2018.

The details of the program are:

- Resource person** : **Dr. N. Godhantaraman**
Deputy Director & Head in-charge
Centre for Environmental Sciences
University of Madras
Chennai
- Convener** : **Dr. L. Jeyanthi Rebacca**
- Coordinator** : **Dr. Kalaiyarasu**

The interested students shall register their names for the programs. All are invited to take active part in the program.

About the Institution

The first self-financing Engineering College in the name of Bharath Institute of Science and Technology (BIST) was started in Tamil Nadu in 1984 by Sri Lakshmi Annull Educational Trust, established by the academic visionary Dr S Jagathrakshakan. The trust then started Sree Balaji Dental College and Hospital, in 1989. Sree Balaji Dental College and Hospital was first recognized as a Deemed to be University by MHRD in July 2002, under section 3 of the UGC Act 1956 under the new trust Bharath Institute of Higher Education and Research (BIHER). The Bharath Institute of Science and Technology (BIST) was then brought under the ambit of Bharath Institute of Higher Education and Research (BIHER) in January 2003.

Thus, Bharath Institute of Higher Education and Research (BIHER) is providing multi-stream, multi-cultural and high quality education to nearly 10000 students from around the world. It is functioning in a sprawling area of 305 acres of land with 1.3 crore sq.ft buildings located in 6 Campuses both in Tamil Nadu and Puducherry with the state of the art infrastructure facilities. There are well qualified Teaching Faculty members to teach various UG and PG programmes and to guide Ph.D. Research.

About the Department

The Department of Biotechnology and Microbiology was established in 2015 to nurture the young minds with research and advanced technology based learning in the interdisciplinary areas of biological sciences. The main objective of the Department is to provide academic training and conduct the interdisciplinary research with a particular emphasis on extending the knowledge towards the development.

The Faculty members are frequently publishing research articles in reputed National and International Journals. They deliver Lectures in National and International Conferences / Symposia / Workshops and publish research articles.

Seminar Objectives

Carbohydrates are found in a wide array of both healthy and unhealthy foods—bread, beans, milk, popcorn, potatoes, cookies, spaghetti, soft drinks, corn, and cherry pie. They also come in a variety of forms. The most common and abundant forms are sugars, fibers, and starches.

Foods high in carbohydrates are an important part of a healthy diet. Carbohydrates provide the body with glucose, which is converted to energy used to support bodily functions and physical activity. But carbohydrate quality is important; some types of carbohydrate-rich foods are better than others. The healthiest sources of carbohydrates—unprocessed or minimally processed whole grains, vegetables, fruits and beans—promote good health by delivering vitamins, minerals, fiber, and a host of important phytonutrients.

Important dates
