- 3) FUNCTIONS OF GALL

What are the signs or symptoms of gallbladder problems?

The symptoms of gallbladder problems vary. Some people don't feel gallstones or even know they have them. But if gallstones block the flow of bile, the organ at the back of your gallbladder is pinched. You may experience the following symptoms:

- Upper right abdominal pain
- Upper right abdominal pain
- Upper right abdominal pain radiating to the right shoulder or neck
- Flare-ups of indigestion or fatty foods
