# **Academic Course Description**

# BHARATH UNIVERSITY Faculty of Engineering and Technology

Department of Mechanical Engineering

## **BPH201 - ENGINEERING PHYSICS II**

Second Semester, 2015-16 (Even Semester)

## Course (catalog) description

To expose the students to multiple areas of science of engineering materials which have direct relevance to different Engineering applications To understand the concepts and applications of conducting, Semiconducting, magnetic & dielectric materials as well as their optical properties.

Compulsory/Elective course : Compulsory for I year B.Tech students

Credit & contact hours : 3 & 45

Course Coordinator : Dr .Srilatha

Instructors :

Name of the	Class	Office	Office	Email (domain:@	Consultation

Dr Velavan	I <sup>st</sup> Year	First Year			9.00 - 9.50 AM
		Block			
Dr. Sreelatha	I <sup>st</sup> Year	First Year			12.45 - 1.15
		Block			PM
Mrs. Radhika	I <sup>st</sup> Year	First Year			9.00 - 9.50 AM
		Block			
Ms. Myvizhi	I <sup>st</sup> Year	First Year			12.45 - 1.15
		Block			PM
Ms. Sheeba	I <sup>st</sup> Year	First Year			9.00 - 9.50 AM
		Block			
Ms. Suganya	I <sup>st</sup> Year	First Year			12.45 - 1.15
		Block			PM
Dr. Selvi	I <sup>st</sup> Year	First Year			9.00 - 9.50 AM
		Block			
Dr. Sugumar	I <sup>st</sup> Year	First Year			12.45 - 1.15
		Block			PM
Mrs. Antony Lyla	I <sup>st</sup> Year	First Year			9.00 - 9.50 AM
		Block			
Mr. Seevagan	I <sup>st</sup> Year	First Year			12.45 - 1.15
		Block			PM

### Relationship to other courses:

Pre –requisites : ENGINEERING PHYSICS I

Assumed knowledge : Basic knowledge in Engineering Materials

Following courses : Fluid Mechanics

**Syllabus Contents** 

#### **UNIT I CONDUCTING MATERIALS**

9 HOURS

Conductors – classical free electron theory of metals – Electrical and thermal conductivity – Wiedemann – Franz law – Lorentz number – Draw backs of classical theory – Quantum theory – Fermi distribution function – Effect of temperature on Fermi Function – Density of energy states – carrier concentration in metals.

#### **UNIT II SEMICONDUCTING MATERIALS**

9 HOURS

Intrinsic semiconductor – carrier concentration derivation Fermi level – Variation of Fermi level with temperature – electrical conductivity – band gap determination – compound semiconductors -direct and indirect band gap- derivation of carrier concentration in n-type and p-type semiconductor – variation of Fermi level with temperature and impurity concentration — Hall effect –Determination of Hall coefficient – Applications.

#### **UNIT III MAGNETIC AND SUPERCONDUCTING MATERIALS**

9 HOURS

Origin of magnetic moment – Bohr magneton – comparison of Dia, Para and Ferro magnetism – Domain theory – Hysteresis – soft and hard magnetic materials – antiferromagnetic materials – Ferrites and its applications Superconductivity: properties – Type I and Type II superconductors – BCS theory of superconductivity(Qualitative) - High Tc superconductors – Applications of superconductors – SQUID, cryotron, magnetic levitation.

#### UNIT IV DIELECTRIC MATERIALS

9 HOURS

Electrical susceptibility – dielectric constant – electronic, ionic, orientational and space charge polarization – frequency and temperature dependence of polarisation – internal field – Claussius – Mosotti relation (derivation) – dielectric loss – dielectric breakdown – uses of dielectric materials (capacitor and transformer) – ferroelectricity and applications.

#### UNIT V ADVANCED ENGINEERING MATERIALS

9 HOURS

Metallic glasses: preparation, properties and applications. Shape memory alloys (SMA): Characteristics, properties of NiTi alloy, application, Nanomaterials—Preparation—pulsed laser deposition—chemical vapour deposition—Applications—NLO materials—Birefringence—optical Kerr effect—Classification of Biomaterials and its applications.

Total: 45 HOURS

## Computer usage: Nil

## **Professional component**

General-0%Basic Sciences-0%Engineering sciences & Technical arts-100%Professional subject-0%

Broad area: Conducting, Semiconducting, magnetic & dielectric materials as well as their optical properties

## **Test Schedule**

S. No.	Test	Tentative Date	Portions	Duration
1	Cycle Test-1	February 2 <sup>nd</sup> week	Session 1 to 14	2 Periods
2	Cycle Test-2	March 2 <sup>nd</sup> week	Session 15 to 28	2 Periods
3	Model Test	April 3 <sup>rd</sup> week	Session 1 to 45	3 Hrs
_	University	ТВА	All sessions / Units	3 Hrs.
5	Examination			

## **Mapping of Instructional Objectives with Program Outcome**

This course is to develop a strong foundation in analysis and design of digital electronics.			lates to		
This course introduces combinational and sequential circuit design. It also discussed			program		
concepts of memory, programmable logic and digital integrated circuits.			outcome		
	Н	М	L		
1. Recall the different number systems and demonstrate the simplification of Boolean	а				
expressions using Boolean algebra & K-Map method.					
2. Analyze the Combinational building blocks	С	е	b		
3. Analyze the sequential building blocks	d	b			
4. Develop a state diagram and simplify the given sequential logic.	а	С	d		
5. To illustrate the concept of synchronous sequential circuits			b,c		
6. To illustrate the concept of asynchronous sequential circuits	а				

H: high correlation, M: medium correlation, L: low correlation

## **Draft Lecture Schedule**

S.NO	Topics	Problem solving (Yes/No)	Text / Chapter	
UNIT I	CONDUCTING MATERIALS			
1.	Conductors – classical free electron theory of metals	Yes		
2.	Electrical and thermal conductivity	Yes	7	
3.	Wiedemann – Franz law – Lorentz number	Yes		
4.	Draw backs of classical theory	Yes		
5.	Quantum theory	Yes	[T1]	
6.	Fermi distribution function	Yes	[R3]	
7.	Effect of temperature on Fermi Function	Yes		
8.	Density of energy states	Yes	_	
9.	Carrier concentration in metals	No		
UNIT II	SEMICONDUCTING MATERIALS			
10.	Intrinsic semiconductor	No		
11.	Carrier concentration derivation Fermi level – Variation of	Yes		
	Fermi level with temperature			
12.	Electrical conductivity – band gap determination	Yes	── [T1]   [R1]	
13.	Compound semiconductors	No		
14.	Direct and indirect band gap- derivation of carrier	No		
	concentration in n-type and p-type semiconductor			
15.	Variation of Fermi level with temperature and impurity	Yes		
	concentration			
16.	Hall effect	Yes		
17.	Determination of Hall coefficient	Yes		
18.	Applications.	No		
UNIT III	MAGNETIC AND SUPERCONDUCTING MATERIALS			
19.	Origin of magnetic moment – Bohr magneton	Yes		
20.	Comparison of Dia, Para and Ferro magnetism	No	_	
21.	Domain theory	Yes		
22.	Hysteresis – soft and hard magnetic materials	Yes	[#4]	
23.	Antiferromagnetic materials	Yes	— [T1] — [R1]	
24.	Ferrites and its applications Superconductivity : properties	No		
	– Type I and Type II superconductors			
25.	BCS theory of superconductivity(Qualitative)	Yes		
26.	High Tc superconductors	Yes		
27.	Applications of superconductors	No	7	
28.	SQUID, cryotron, magnetic levitation.	Yes		
UNIT IV	IVDIELECTRIC MATERIALS			
29.	Electrical susceptibility	No		
30.	Dielectric constant – electronic, ionic, orientational and	No		
	space charge polarization			

31.	Frequency and temperature dependence of polarisation	No		
32.	Internal field	No	[T1]	
33.	Claussius – Mosotti relation (derivation)	No	[R1]	
34.	Claussius – Mosotti relation (derivation)	No		
35.	Dielectric loss	Yes		
36.	Dielectric breakdown	No		
37.	Uses of dielectric materials (capacitor and transformer)	No		
38.	Ferroelectricity and applications	Yes		
UNIT V A	DVANCED ENGINEERING MATERIALS			
39.	Metallic glasses: preparation, properties and applications	Yes		
40.	Shape memory alloys (SMA): Characteristics, properties of	Yes		
	NiTi alloy, application			
41.	Nanomaterials – Preparation -pulsed laser deposition	No	[T1]	
42.	Chemical vapour deposition – Applications	No	[R1]	
43.	NLO materials	No		
44.	Birefringence- optical Kerr effect	Yes		
45.	Classification of Biomaterials and its applications	No		

## **Teaching Strategies**

The teaching in this course aims at establishing a good fundamental understanding of the areas covered using:

- Formal face-to-face lectures
- Tutorials, which allow for exercises in problem solving and allow time for students to resolve problems in understanding of lecture material.
- Laboratory sessions, which support the formal lecture material and also provide the student with practical construction, measurement and debugging skills.
- Small periodic quizzes, to enable you to assess your understanding of the concepts.

## **Evaluation Strategies**

 Cycle Test – I
 5%

 Cycle Test – II
 5%

 Model Test
 10%

 Assignment /
 5%

 Seminar / Online
 5%

 Test / Quiz
 5%

 Attendance
 5%

 Final exam
 70%

**Prepared by**: Dr P. Sugumar Assistant Professor, Department of Physics

#### Addendum

## ABET Outcomes expected of graduates of B.Tech / MECH / program by the time that they graduate:

- a) The ability to apply knowledge of mathematics, science, and engineering fundamentals.
- b) The ability to identify, formulate and solve engineering problems.
- c) The ability to design a system, component, or process to meet the desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- d) The ability to design and conduct experiments, as well as to analyze and interpret data
- e) The ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- f) The ability to apply reasoning informed by the knowledge of contemporary issues.
- g) The ability to broaden the education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- h) The ability to understand professional and ethical responsibility and apply them in engineering practices.
- i) The ability to function on multidisciplinary teams.
- j) The ability to communicate effectively with the engineering community and with society at large.
- k) The ability in understanding of the engineering and management principles and apply them in project and finance management as a leader and a member in a team.
- I) The ability to recognize the need for, and an ability to engage in life-long learning.

## **Program Educational Objectives**

#### PEO1: PREPARATION:

Mechanical Engineering graduatesare enthusiastic to provide strong foundation in mathematical, scientific and engineering fundamentals necessary to analyze, formulate and solve engineering problems in the field of Mechanical Engineering.

#### PEO2: CORE COMPETENCE:

Mechanical Engineering graduates have competence to enhance the skills and experience in defining problems in the field of Mechanical Engineering and Technology design and implement, analyzing the experimental evaluations, and finally making appropriate decisions.

#### PEO3: PROFESSIONALISM:

Mechanical Engineering graduates made competence to enhance their skills and embrace new thrust areas through self-directed professional development and post-graduate training or education.

#### PEO4: PROFICIENCY:

Mechanical Engineering graduates became skilled to afford training for developing soft skills such as proficiency in many languages, technical communication, verbal, logical, analytical, comprehension, team building, inter personal relationship, group discussion and leadership skill to become a better professional.

#### PEO5: ETHICS:

Mechanical Engineering graduates are morally merged to apply the ethical and social aspects of modern Engineering and Technology innovations to the design, development, and usage of new products, machines, gadgets, devices, etc.
