Academic Course Description

BHARATH UNIVERSITY Faculty of Engineering and Technology Department of Electrical and Electronics Engineering

BME702 & OPERATIONS RESEARCH FOR ENGINEERS Seventh semester (odd Semester)

Course (catalog) description

To impart knowledge about various tools in Operations Research to apply and solve real life problems in Engineering.

Compulsory/Elective course : Credit & contact	:	Compulsory for EEE students
hours	:	4 & 60
Course Coordinator	:	Dr.Ramya
Instructors	: D)r.Ramya

Name of the	Class	Office	Office	Email (domain:@	Consultation
instructor	handling	location	phone	bharathuniv.ac.in	
Dr.Ramya	Final year, MECH	JR 304	04422290125	Hod.maths@gmail.com	9.00 - 9.50 AM

Relationship to other courses:

: MathsI, MathsII, MathsIII Pre-requisites

Assumed knowledge : Engineering Maths

Syllabus Contents

UNIT – I LINEAR PROGRAMMING

Introduction to phases of Operations Research - Linear programming - formulation of the problem graphical method - simplex method - two phase method - Assignment problems - Transportation models -Vogel's approximation method – Modi method – unbalanced transportation problem – degeneracy in transportation models.

UNIT – IIRESOURCE SCHEDULING AND NETWORKS

Resource scheduling – Sequencing n jobs through 2 machines and 3 machines. Networks – PERT and CPM - Network diagrams - shortest route - minimum spanning tree - probability of achieving completion date crash time - cost analysis - resource smoothing and resource levelling.

UNIT – III INVENTROY AND REPLACEMENT MODELS

Inventory models- Types of Inventory and variables in the Inventory problem – deterministic models-Replacement models – Replacement of items that deteriorate with time – equipment that fails completely and

their analysis – factors for evaluation of proposals of capital expenditures and comparison and alternatives – present value average investment – rate of return pay off period – individual and group replacement policy.

12

UNIT – IV QUEUEING MODELS

Queuing theory – queuing system and structure – Kendalls's notation– Poisson arrival and exponential service time – characteristic of queuing models – single channel and multiple models – simulation. UNIT – VDECISION MODELS 12

Game theory –Saddle point-Maximin-Minimax principle-Two person zero sum games (mixed Strategies)-Graphical method for 2×n or m×2 games-Dominance Property-Oddment method

Professional subject	-	100%

Broad area :

Test Schedule

S. No.	Test	Tentative Date	Portions	Duration
1	Cycle Test-1	August 1 st week	Session 1 to 14	2 Periods
2	Cycle Test-2	September 2 nd week	Session 15 to 28	2 Periods
3	Model Test	October 2 nd week	Session 1 to 45	3 Hrs
4	University	ТВА	All sessions / Units	3 Hrs.
4	Examination			

Mapping of Instructional Objectives with Program Outcome

To enable the students to gain a fair knowledge on characteristics and		Correla	tes to
applications of electrical drives and how to control the speed of the AC & DC		program outcome	
Motors.	н	М	L

Apply linear programming model and assignment model to domain specific situations	A	L	
Analyze the various methods under transportation model and apply the model for testing the closeness of their results to optimal results.	J	C,G,I	A,E
Apply the concepts of PERT and CPM for decision making and optimally managing projects	E,H		L
Analyze the various replacement and sequencing models and apply them for arriving at optimal decisions	B,C,H,J		I
Analyze the inventory and queuing theories and apply them in domain specific situations.	E,L	A,I	

H: high correlation, M: medium correlation, L: low correlation

Draft Lecture Schedule

S.NO	Topics	Problem solving (Yes/No)	Text / Chapter		
UNIT – I	LINEAR PROGRAMMING				
1.	Introduction to phases of Operations Research	YES			
2.	formulation of the problem	YES			
3.	graphical method – simplex method – two phase	YES			
	method		T1, r2		
4.	Assignment problems – Transportation models	YES			
5.	Vogel's approximation method – Modi method	YES			
6.	unbalanced transportation problem – degeneracy in transportation models.	YES	-		
UNIT – IIR	ESOURCE SCHEDULING AND NETWORKS				
7.	Resource scheduling – Sequencing n jobs through 2 machines and 3 machines. Networks	YES	T1 , r4		
8.	PERT and CPM – Network diagrams – shortest	YES			
	route				
9.	minimum spanning tree – probability	YES			
10.	crash time – cost analysis	YES			
11.	resource smoothing and resource levelling.	YES			
UNIT – III	INVENTROY AND REPLACEMENT MODELS				
12.	Inventory models- Types of Inventory and	YES	T1, r3		
	variables in the Inventory problem				
13.	deterministic models- Replacement models	YES			
14.	 Replacement of items that deteriorate with time equipment that fails completely and their 	YES			
15	analysis factors for evaluation of proposals of capital	VES			
15.	expenditures and comparison and alternatives	125			
16.	- present value average investment - rate of return				
	policy				
UNIT – IV	QUEUEING MODELS				
17.	Queuing theory – queuing system and structure –	YES	T1		
	Kendalls's notation				
18.	Poisson arrival and exponential service time	YES			
19.	- characteristic of queuing models	YES			
20.	- characteristic of queuing models	YES			
UNIT –V	DECISION MODELS Page 4 of 8				
21.	Game theory –Saddle point-Maximin-Minimax	YES	R2.r3		

	principle	
22.	Two person zero sum games	YES
23.	Graphical method for 2×n or m×2 games-Dominance Property-Oddment method.	yes

Teaching Strategies

The teaching in this course aims at establishing a good fundamental understanding of the areas covered using:

- Formal face-to-face lectures
- Tutorials, which allow for exercises in problem solving and allow time for students to resolve problems in understanding of lecture material.
- Laboratory sessions, which support the formal lecture material and also provide the student with practical construction, measurement and debugging skills.
- Small periodic quizzes, to enable you to assess your understanding of the concepts.

Evaluation Strategies

Cycle Test – I	-	5%
Cycle Test – II	-	5%
Model Test	-	10%
Assignment /		
Seminar / Online		
Test / Quiz	-	5%
Attendance	-	5%
Final exam	-	70%

Prepared by: Dr.RAMYA

BEE703 & ELECTRICAL DRIVES AND CONTROL

Addendum

ABET Outcomes expected of graduates of B.Tech / EEE / program by the time that they graduate:

- a) An ability to apply knowledge of mathematics, science, and engineering fundamentals.
- b) An ability to identify, formulate, and solve engineering problems.
- c) An ability to design a system, component, or process to meet the desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
- d) An ability to design and conduct experiments, as well as to analyze and interpret data.
- e) An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

- f) An ability to apply reasoning informed by the knowledge of contemporary issues.
- g) An ability to broaden the education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- h) An ability to understand professional and ethical responsibility and apply them in engineering practices.
- i) An ability to function on multidisciplinary teams.
- j) An ability to communicate effectively with the engineering community and with society at large.
- k) An ability in understanding of the engineering and management principles and apply them in project and finance management as a leader and a member in a team.
- I) An ability to recognize the need for, and an ability to engage in life-long learni.

Program Educational Objectives

PEO1: PREPARATION

Electrical Engineering Graduates are in position with the knowledge of Basic Sciences in general and Electrical Engineering in particular so as to impart the necessary skill to analyze and synthesize electrical circuits, algorithms and complex apparatus.

PEO2: CORE COMPETENCE

Electrical Engineering Graduates have competence to provide technical knowledge, skill and also to identify, comprehend and solve problems in industry, research and academics related to power, information and electronics hardware.

PEO3: PROFESSIONALISM

Electrical Engineering Graduates are successfully work in various Industrial and Government organizations, both at the National and International level, with professional competence and ethical administrative acumen so as to be able to handle critical situations and meet deadlines.

PEO4: SKILL

Electrical Engineering Graduates have better opportunity to become a future researchers/ scientists with good communication skills so that they may be both good team-members and leaders with innovative ideas for a sustainable development.

PEO5: ETHICS

Electrical Engineering Graduates are framed to improve their technical and intellectual capabilities through life-long learning process with ethical feeling so as to become good teachers, either in a class or to juniors in industry.
