

<b>Course Number and Name</b>													
BME4L1 - METROLOGY & METALLURGY LAB													
<b>Credits and Contact Hours</b>													
2 & 45													
<b>Course Coordinator's Name</b>													
Ms.Sucharitha													
<b>Text Books and References</b>													
Lab Manual													
<b>Course Description</b>													
To make the students understand the concept of standardization and interchangeability													
To familiarize the students with metallographion structures of different materials.													
<b>Prerequisites</b>							<b>Co-requisites</b>						
Nil							Metrology						
required, elective, or selected elective (as per Table 5-1)													
Required													
<b>Course Outcomes (COs)</b>													
CO1		Students will understand the difference between accuracy and precision											
CO2		Students will be aware of different measuring equipments .											
CO3		Student will have hands on experience in handling a metallurgical microscope .											
CO4		Student will understand metallographic structures of different materials.											
CO5		Student will understand crystallographic structures of different materials.											
CO6		Students will learn to measure the profile of a gear.											
<b>Student Outcomes (SOs) from Criterion 3 covered by this Course</b>													
	COs/SOs	a	b	c	d	e	f	g	h	i	j	k	l
	CO1	H								M			
	CO2											H	L
	CO3									M			
	CO4												L
	CO5												
	CO6					H				M

List of Topics Covered

**LIST OF EXPERIMENTS:**

**METROLOGY LABORATORY**

1. Estimation of accuracy of instruments-vernier and micrometer.
2. Calibration of dial gauge, micrometer and vernier.
3. Measurement of angles using sine bar, bevel protractors, spirit level.
4. Measurement of gear tooth thickness by various methods including profile projector.
5. Measurement of effective diameter, pitch and helix angle of screw threads by profile projector.

**METALLURGY LABORATORY**

1. Study of metallurgical microscope
2. Preparation of specimen for metallographic observation of white Cast Iron, Grey Cast Iron, Malleable Iron.
3. Preparation of specimen for metallographic observation of Mild Steel, Low Carbon Steel, Medium Carbon Steel, Tool Steel, and High speed Steel, and Stainless steel.
4. Preparation of specimen for metallographic observation of Copper-bronze, Copper brass.
