Course Proposal

Course Title:

Home Health Aide

Course Objective:

1. Introduce the students to health care
2. To learn complex of Home Health Aide

Course Outcome:

Gain knowledge on Home Health Aide better understanding and easy learning

Course Audience: 1st year MBBS

Course Coordinator: Dr.Mallika Arjuna

Course Faculties with Qualification and Designation:

1. Dr. B Rajesh, M.Sc., Ph.D, Professor/Anatomy
2. Mr.N.Anandaramajayan, M.Sc, Assistant Professor/Anatomy

Course Curriculum/subtopics with schedule (30 hours)

Sl.No	Date	Topic	Time	Hours	Faculty Name
1.	15.12.20	Basic human anatomy & physiology	1-5p.m	4	Dr. B Rajesh
2.	16.12.20	Understanding a patient's needs	4-5p.m	1	Mr.N.Anandaramajayan
3.	17.12.20	Caring for the visually impaired	4-5p.m	1	Dr. B Rajesh
4.	19.12.20	Daily care of a patient	4-5p.m	1	Dr. B Rajesh
5.	20.12.20	Feeding a patient	4-5p.m	2	Mr.N.Anandaramajayan
6.	21.12.20	Basic nursing skills	4-5p.m	1	Dr. B Rajesh
7.	22.12.20	Understanding body mechanics	4-5p.m	1	Dr. B Rajesh

HOME CARE AIDE

BIHER

SLIMS

Home care aide

Introduction:

Home care includes any professional support services that allow a person to live safely in their home. In-home care services can help someone who is aging and needs assistance to live independently; is managing chronic health issues; is recovering from a medical setback; or has special needs or a disability. Professional caregivers such as nurses, aides, and therapists provide short-term or long-term care in the home, depending on a person's needs.

The care you need in the place you love

Home care can be the key to achieving the highest quality of life possible. It can enable safety, security, and increased independence; it can ease management of an ongoing medical condition; it can help avoid unnecessary hospitalization; it can aid with recovery after an illness, injury, or hospital stay—all through care given in the comfort and familiarity of home. Home care can include:

Help with daily activities such as dressing and bathing

Assistance with safely managing tasks around the house

Companionship

Therapy and rehabilitative services

Short- or long-term nursing care for an illness, disease, or disability—including tracheostomy and ventilator care

Types of home care

Not all home care providers offer all the different types of home care services. This short guide will provide an overview of the different types of home care. Care is customized to your individual needs and may include services from one or more of the types described. Contacting a provider to discuss your needs can help determine what care is best for you.

While the multiple types of home care may serve different needs, they share a common goal: to enable happier, more independent living for the people receiving care, and to provide support and peace of mind for their families.

Types of home care

PERSONAL CARE AND COMPANIONSHIP

BIHER

SLIMS

→ Help with everyday activities like bathing and dressing, meal preparation, and household tasks to enable independence and safety

Also known as Non-medical care, home health aide services, senior care, homemaker care, assistive care, or companion care

PRIVATE DUTY

NURSING CARE

→ Long-term, hourly nursing care at home for adults with a chronic illness, injury, or disability

Also known as Home-based skilled nursing, long-term nursing care, catastrophic care, tracheostomy care, ventilator care, nursing care, shift nursing, hourly nursing, or adult nursing

HOME

HEALTH CARE

→ Short-term, physician-directed care designed to help a patient prevent or recover from an illness, injury, or hospital stay

Also known as Medicare-certified home health care, intermittent skilled care, or visiting nurse services

EXAMPLES OF CARE SERVICES

Personal Care and Companionship services may include:

- Assistance with self-care, such as grooming, bathing, dressing, and using the toilet
- Enabling safety at home by assisting with ambulation, transfer (eg, from bed to wheelchair, wheelchair to toilet), and fall prevention
- Assistance with meal planning and preparation, light housekeeping, laundry, errands, medication reminders, and escorting to appointments
- Companionship and engaging in hobbies and activities
- Supervision for someone with dementia or Alzheimer's disease

Private Duty Nursing Care services may include:

- Care for diseases and conditions such as Traumatic brain injury (TBI), Spinal cord injury (SCI), ALS, MS
- Ventilator care

BIHER

SLIMS

- Tracheostomy care
- Monitoring vital signs
- Administering medications
- Ostomy/gastrostomy care

Feeding tube care

Catheter care

Home Health Care services may include:

Short-term nursing services

Physical therapy

Occupational therapy

Speech language pathology

Medical social work

Home health aide services

HOW IS IT PAID?

Personal care and companionship services are usually paid directly by the person receiving care (private pay), or through long-term care insurance or Medicaid. Other funding sources may be:

Private pay

Long-term care insurance

Health insurance

Veterans benefits

Workers' compensation

Private duty nursing care can be paid through a variety of sources, including:

Private pay

Health insurance

Veterans benefits

Workers' compensation

Medicaid (with qualifications)

BIHER

SLIMS

Direct payment by person receiving care (private pay)

When specific qualifications are met (generally, when services are ordered by a physician and a clinical assessment deems them necessary), Home Health services are typically paid for
