CIRCULAR

Many a times, the defined skill sets that are being imparted to students today with Programme Specific Objectives in educational institutions become redundant sooner than later due to rapid technological advancements. It is important for higher education institutions to supplement the curriculum to make students better prepared to meet industry demands as well as develop their own interests and aptitudes.

Hence a Value Added Course is offered by Department of School of Civil and Infrastructure Engineering, Bharath Institute of Higher Education & Research. The course offered is **Basics of Interior and Decoration** with the duration of 30 hours (Two hour per day) and commences from **24/11/2021 to 14/12/2021**.

Eligibility: Course is open for UG Students for Department School of Civil and Infrastructure Engineering.

Registration:

The registration form which is available in the university website should be duly filled by the participants and to be submitted to the Coordinator at least 5 days before the commencement of course.

COURSE OUTLINE:

Interior design is an exciting profession that not only requires designers to be able to think creatively, but also to problem-solve. Interior designers are responsible for creating an environment for a structure, which may include a single-family home, government office, corporate headquarters, and everything in between

In order to create an interior environment, designers need to think about the form and functionality of the space. The form refers to the look and feel. The functionality refers to how they space will be practically used. In order to effectively blend form and functionality, designers need to rely upon many resources, guidelines, and professionals.

Interior designers often tend to be interior decorators. After all, designers are often responsible for all aspects of a project, including the design, development, and finishing touches. However, interior decorators may not necessarily be interior designers; designers need to have more in-depth knowledge than decorators.

While many interior designers are also decorators, designers do not generally take on other professional roles, such as plumber, carpenter, electrician, or otherwise. Therefore, designers must work closely with many other industry professionals.

Interior designers also have the liberty to be self-employed or to work with a firm. Either way, there are some business skills and best practices that every interior designer should use in order to be successful.

This course is designed to teach you how to be an interior designer by focusing on interior design from a macro level. If you decide to pursue an interior design career after reading about everything that will be required of you if you choose to pursue a career in interior design, then you will spend years learning the minute details that are essential to creating a successful design.
