DISASTER MANAGEMENT:

DEFINITION OF DISASTER :

- — “A disaster can be defined as any occurrence that cause damage, ecological disruption, loss of human life,
- deterioration of health and health services on a scale,
- sufficient to warrant an extraordinary response from outside the affected community or area”.
- **(W.H.O.)**
- — “A disaster can be defined as an occurrence either nature or manmade that causes human suffering and creates human needs that victims cannot alleviate
- without assistance”.
- **American Red Cross (ARC)**

OFFICE OF THE DEAN

[Affiliated to Bharath University, Chennai - TN]

Characteristics of disaster :

- Predictability
- Controllability
- Speed of onset
- Length of forewarning
- Duration of impact
- Scope and intensity of impact

Phases of disaster :

Pre impact

Impact

Post impact

What is disaster management :

— **Disaster management, which is also known as emergency management, can be defined as dealing with and avoiding both natural and man made disasters. Disaster management involves preparedness before disaster, rebuilding and supporting society after natural disasters such as, earthquakes, drought, tsunami etc. In India, there are many areas, which are often affected with natural calamity or man made disasters. They have become top priority for the Ministry of Human Resource Development, Government of India.**

Principle of disaster management :

[Affiliated to Bharath University, Chennai - TN]

- **Disaster management is the responsibility of all spheres of government**
- **Disaster management should use resources that exist for a day-to-day purpose.**
- **Organizations should function as an extension of their core business**
- **Individuals are responsible for their own safety.**
- **Disaster management planning should**

focus on large-scale events.

- **Disaster management planning should recognize the difference between incidents and disasters.**
- **Disaster management operational arrangements are additional to and do not replace incident management operational arrangements**
- **Disaster management planning must take account of the type of physical environment and the structure of the population.**
- **Disaster management arrangements must recognise the**

involvement and potential role of non- government agencies

Disaster preparedness:

Preparedness should be in the form of money, manpower and materials

- Evaluation from past experiences about risk
- Location of disaster prone areas
- Organization of communication, information and warning system
- Ensuring co-ordination and response mechanisms
- Development of public education programme
