## Requisition Letter

Date: 23.11.2018

From  
Dr. K.P.Kaliyamurthie,  
Professor & Head,  
Department of CSE,  
Bharath Institute of Higher Education and Research,  
Chennai

To  
The Dean Engineering,  
Bharath Institute of Higher Education and Research,  
Chennai

Respected sir

Subject: Request of Permission to conduct a value-added course on **“CERTIFICATE COURSE ON IMPLEMENT ADOBE ADVERTISING CLOUD SEARCH ACCORDING TO BUISNESS GOALS”** -Reg

With reference to above subject, I would like to bring to your kind notice that, our department interested to organize value added course on **“CERTIFICATE COURSE ON IMPLEMENT ADOBE ADVERTISING CLOUD SEARCH ACCORDING TO BUISNESS GOALS”** in our campus premises on **5.12.2018**, students would be participating in this course. We request you kindly to give permission to organize this event.

Venue: **CSE Smart Room**

Timing 4:00 PM to 6:00 PM.Monday to Friday

Submitted to Principal for approval to organize this value-added course.

## CIRCULAR

30.11.2018

The School of computing, Bharath Institute of Higher Education and Research is planned to conduct a certification value added course on **IMPLEMENT ADOBE ADVERTISING CLOUD SEARCH ACCORDING TO BUISNESS GOALS** for the benefit of II, III and IV year students. This course is scheduled from 5.12.2018 for 30hours which includes theory and practical. The timings are 4:00 PM to 6:00 PM from Monday to Friday.

All Registered Students must attend all the classes without fail. The following faculty members are assigned to handle the course. S.NO	Name of the Faculty	Designation
1	Mrs.Velvizhi	Professor
2	Mrs.Nalini	Professor

## **CERTIFICATE COURSE ON IMPLEMENT ADOBE ADVERTISING CLOUD SEARCH ACCORDING TO BUISNESS GOALS**

**Date of Introduction of the Course:5.12.2018**

### **COURSE SYLLABUS**

#### **1. MODULE 1:**

Cloud Computing fundamentals, private, public and hybrid cloud. Cloud types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, public vs private clouds, role of virtualization in enabling the cloud; Business Agility: Benefits and challenges to Cloud architecture .

#### **2. MODULE 2:**

CLOUD APPLICATIONS:Technologies and the processes required when deploying web services; Deploying a web service from inside and outside a cloud architecture, advantages and disadvantages.

#### **3. MODULE3:**

MANAGEMENT OF CLOUD SERVICES :Reliability, availability and security of services deployed from the cloud. Performance and scalability of services, tools and technologies used to manage cloud services deployment.

#### **4. MODULE 4:**

Cloud Economics : Cloud Computing infrastructures available for implementing cloud based services. Economics of choosing a Cloud platform for an organization, based on application requirements, economic constraints and business needs (e.g Amazon, Microsoft and Google, Salesforce.com, Ubuntu and Redhat.

#### **5. MODULE 5:**

APPLICATION DEVELOPMENT :Service creation environments to develop cloud based applications. Development environments for service development; Amazon, Azure, Google App.

#### **6. MODULE 6:**

CLOUD IT MODEL : Analysis of Case Studies when deciding to adopt cloud computing architecture. How to decide if the cloud is right for your requirements. Cloud based service, applications and development platform deployment so as to improve the total cost of ownership (TCO).

#### **7.MODULE 7:**

VIRTUALIZED DATA CENTER ARCHITECTUR:Cloud infrastructures; public, private, hybrid. Service provider interfaces; SaaS, PaaS, IaaS. VDC environments; concept, planning and design, business continuity and disaster recovery principles. Managing VDC and cloud environments and infrastructures.

#### **8. MODULE 8:**

INFORMATION STORAGE SECURITY & DESIGN:Storage strategy and governance; security and regulations. Designing secure solutions; the considerations and implementations involved. Securing storage in virtualized and cloud environments.

## 9. MODULE 9:

Monitoring and management; security auditing and SIEM.

## 10. MODULE 10:

INFORMATION STORAGE SECURITY & DESIGN :Storage strategy and governance; security and regulations. Designing secure solutions; the considerations and implementations involved. Securing storage in virtualized and cloud environments. Monitoring and management; security auditing and SIEM.

## 11. MODULE 11:

OPTIMIZATION OF CLOUD STORAGE: Global storage management locations, scalability, operational efficiency. Global storage distribution; terabytes to petabytes and greater. Policy based information management; metadata attitudes; file systems or object storage

## 12. MODULE 12:

INFORMATION AVAILABILITY DESIGN : Designing backup/recovery solutions to guarantee data availability in a virtualized environment. Design a replication solution, local remote and advanced. Investigate Replication in NAS and SAN environments. Data archiving solutions; analyzing compliance and archiving design considerations.

## 13. MODULE 13:

VIRTUALIZATION SYSTEM-SPECIFIC ATTACKS:Guest hopping, attacks on the VM (delete the VM, attack on the control of the VM, code or file injection into the virtualized file structure), VM migration attack, hyperjacking.

## 14. MODULE 14:

LEGAL AND COMPLIANCE ISSUES :Responsibility, ownership of data, right to penetration test, local law where data is held, examination of modern Security Standards (eg PCIDSS),

## 15. MODULE 15:

How standards deal with cloud services and virtualization, compliance for the cloud provider vs. compliance for the customer

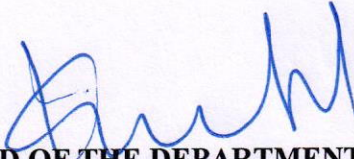

### COURSE OBJECTIVES

This course provides a comprehensive view of storage and networking infrastructures for highly virtualized cloud ready deployments. The course on cloud security introduces the basic concepts of security systems and cryptographic protocols, which are widely used in the design of cloud security. The issues related multi tenancy operation, virtualized infrastructure security and methods to improve virtualization security are also dealt with in this course.

### Specifically, the course has the following objectives

1. Critically appraise the opportunities and challenges of information management in complex business environments
2. Evaluate information storage management design in a cloud environment and how it relates to the business objectives of an organization .
3. Analyze how best to provide reliable access to information both locally and remotely using storage technologies .
4. Investigate how a global storage solution can be optimized so that it can be delivered successfully from the cloud
