ADVANCED TRAINING IN HEARING LANGUAGE AND SPEECH

Course outcome

The programme is designed to generate manpower that will cater to the needs of individuals with communication disorders at the grass-root level. In this programme the students are trained to identify individuals with communication disorders and make appropriate referrals for further diagnosis. The students are also trained to supervise the caregivers in following the guidelines given by professionals for rehabilitation. Extensive practical training is given to supplement the theoretical knowledge that is imparted.

Course objectives

This course is aimed at training lower level functionaries in the area of hearing, language and speech. The course is designed as a comprehensive and practical oriented programme. The main objective of the course is to generate Speech and Hearing Technicians to take up routine clinical work of assessment and therapeutic management for various speech, language and hearing disorders at village, block/taluka and town levels. Wherever possible they will work under the guidance of a fully trained graduate or a postgraduate Speech & Hearing clinician. However, in the absence of such trained personnel they will be able to execute the routine clinical services. They will be ideally suited to work at district level and below levels, rural health centres, special schools for spastics, schools for the mentally retarded and school for the deaf. They can be included as trained Rehabilitation personnel under State/Central health care and/or rehabilitation systems. They shall be designated as "Speech and Hearing Technicians". They may also find openings in hearing aid and other instrument manufacturing/dispensing centres. The course

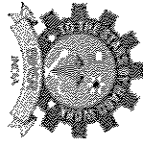

enables the candidates after completion of the course to be self employed. The course provides base for gaining lateral entry into the BASLP equivalent program.

Course coordinator – Assistant Professor and Associate Professor of Otolaryngology

Duration – 30 hours
