CERTIFICATE COURSE IN PEDIATRIC PALLIATIVE CARE**Learning Objectives:**

At the end of this course, the learner will be able to:

1. Discover individual perspectives about end of life issues.
2. Identify the care at the actual time of death to ensure best practices.
3. Discuss the basic principles of palliative care within nursing practice.
4. Discuss the basic principles of pain assessment and management at the end of life.
5. Identify cultural differences in end of life issues to adequately communicate and provide culturally competent care.
6. Discuss key ethical and legal concerns in end of life and palliative care.
7. Emphasize the importance of therapeutic communication at the end of life.
8. Discover the challenging aspects of grief, loss, and bereavement of patients and families, as well as the loss experience of the health care professional.

MODULE –I**Individual perspective:**

1. Assessment of attitudes regarding time of death is helpful to strengthen professional effectiveness.
2. Define personal death awareness and cumulative loss associated with caregiving.

MODULE – II**Preparation for and Care at the time of death:**

1. Assess dying patients and list five physical signs and symptoms of the dying process and three signs of death.
2. Assess physical, psychological, social, and spiritual needs and interventions for a dying patient and their family.

MODULE –III**Palliative care:**

1. Describe the role of the nurse and other members of the health care team, including the role of nursing assistants, in providing quality palliative care.
2. Identify the need for collaboration with team members when implementing palliative care
