Training on Epidemiology: The basic Science in public health

Course Outline :

Public health, epidemiology is the study of the distribution and determinants of diseases, health conditions, or events among populations and the application of that study to control health problems. By applying the concepts learned in this course to current public health problems and issues, students will understand the practice of epidemiology as it relates to real life and makes for a better appreciation of public health programs and policies

Objectives of the course

The program aims to provide students basic skills and expertise to understand health disparities, health inequalities at local, national and global level, impart knowledge to improve health outcomes through the effective planning, implementation and assessment of health interventions to change positive health behaviour. The learning outcomes are:

- Basic understanding of local, national and global health problems and issues
- Comprehensive knowledge on health care system, functions and policies
- Insight into design, implement and assess appropriate interventions to reduce health inequalities

COURSE COORDINATOR: Associate professor / Assistant professor of community medicine

SYLLABUS

Topic	Faculty	Hours allotted
INTRODUCTION	Assistant Professor of Community Medicine	2 hours
Course Introduction, History of Epidemiology and Epidemiology Research	Associate Professor of Community Medicine	2 hours
Understanding Measures of Disease Frequency	Assistant Professor of Community Medicine	2 hours
Study Designs	Associate Professor of Community Medicine	2 hours
Measures of Association	Assistant Professor of Community Medicine	2 hours
Group discussion	Associate Professor of Community Medicine	2 hours

Measures of association and confidence intervals.	Assistant Professor of Community Medicine	2 hours
public health issues like cardiovascular and infectious diseases	Associate Professor of Community Medicine	2 hours
current public health problems and issues	Assistant Professor of Community Medicine	2 hours
Assignment	Associate Professor of Community Medicine	2 hours
Distribution and determinants of health-related states or events in specified populations	Assistant Professor of Community Medicine	2 hours
patterns and determinants of health and disease conditions	Associate Professor of Community Medicine	2 hours
Viva voce	Assistant Professor of Community Medicine	2 hours
Written test	Associate Professor of Community Medicine	2 hours
