Short term course on HIV/AIDS prevention

Background

HIV/AIDS poses a huge challenge to the developmental gains achieved in the past few decades. Sexually Transmissible Infections (STIs) and HIV are closely interlinked and therefore, there is a need to develop comprehensive response that deals with all the aspects of STIs and HIV. This calls for the need of skilled human resources working to prevent, control and treat STIs and HIV. The number of skilled professionals needed are large while matching training programs to strengthen the skills are adhoc or inadequate. The course in STI & HIV/AIDS intends to fill up the existing gap by building capacity of variety of professionals ranging from medical doctors, nurses, counsellors, health educators, trainers, consultants, social workers, program managers, faculty of health-related institutions, researchers to policy makers, by providing necessary training to acquire knowledge, skills and attitude for the prevention and control of STI and HIV/AIDS.

Aims & Objectives

The course aims to equip the professionals working in or intending to work with STI and HIV/AIDS prevention, control and/ or treatment programs with enhanced knowledge, necessary skills and attitude to provide services, implement programs and conduct training & research in STI and HIV/AIDS.

Course Content

This course will provide inter-professional, multidisciplinary, program management-led certificate that meets the needs of students working in a range of disciplines related to sexual health and STIs / HIV, including public health professionals, medical doctors, nurses,

counsellors, educators and program managers. This course will explore the social, public health and medical aspects of HIV and common sexually transmissible infections. Emphasis will be placed on the way in which they impact on society, present to clinical services, and can be prevented and effectively managed. Students will develop an awareness of all aspects of sexual health, including the importance of multidisciplinary approaches and the sexual rights of all individuals. The potential geographic, societal, cultural and political challenges faced in the delivery of effective health care for sexual health, STIs and HIV will be discussed. The program will be strongly research-led and provide the student with an understanding of the importance of evidenced-based practice. Broadly, the course will cover introduction to Sexual health, Epidemiology of STIs and HIV, essential biological and clinical aspects of STIs and HIV, Public Health aspects of STIs and HIV, and Health Promotion, Legal, Policy and Advocacy strategies, Program Management and Monitoring and Evaluation. These will be discussed with a focus on STIs and HIV epidemic in India and will cover the national response to STIs and HIV.

Course Duration: 30 Hours

Course Coordinator: Assistant Professor / Associate professor of Medicine & Community Medicine
