CERTIFICATE PROGRAM IN MRI TECHNICIAN

OBJECTIVIES

1. Prepare patient for magnetic resonance imaging procedures
2. Perform Magnetic Resonance Imaging
3. Operate MRI System and System components
4. Implement professional, legal, ethical, social and political standards with responsibility and accountability to patients

MODULE I:

PATIENT PREPARATION:

Patient history collection

Obtain a complete and accurate history of previous surgeries, allergies, conditions, general complaints, and complaints/symptoms pertinent to the requested MR study by either questioning the patient and/ or reading the chart as provided with in-patientsscreen all patients for metallic implants, devices, foreign and/or loose metallic objects, according to the procedure established by the clinical site, prior to scanning. Follow facilities procedure for securing the patients clothes and valuables prior to scanning.

MODULE II: PATIENT POSITIONING:

Preparing the patient for MRI and positioning

prepare the imaging suite and table for each type of study by selecting and positioning imagine devices and aides such as coils, coil holder, sponges, etc. Assist the patient on and off the imaging table. Position patients, coils, and other devices (as applicable) for each of the following exams and others as performed during the clinical hours: routine head, IAC's orbits, all types of spine exams, abdomen, extremities, pelvis shoulder, chest/heart studies.Satisfactory positioning is to be determined by the staff technologist performing the study or the clinical instructor.

MODULE III: IMAGING PROCEDURE:

Perform Magnetic Resonance Imaging of the head, neck, spine, chest, abdomen, pelvis and musculoskeletal system

The routine Q.A. procedures as dictated by the clinical site's protocols. established imaging protocols as well as demonstrate a working knowledge of those protocols and their desired results. Demonstrate proper use of patient monitoring/triggering devices/methods and explain their applications. Communicate with the patient during the scan by properly utilizing whatever method or system is used. Recognize the patient is distressed through careful observation/communication throughout the imaging procedure

Total Contact Hours: 30
