A good psychiatrist knows it all , Professor **Dr . M.J.SAMANI** is a living example of this statement, from mastering psychotherapeutic techniques to latest trends in pharmacological management there is not a single star in the sky he has not counted. His wisdom knows no bounds from quantum physics to Astroscience to Nano science. And who better to enlighten the medical graduates of how to communicate. His empathetic approach towards students led to the birth of a self development group which is called mind management group. This type of group is first of its kind in the whole of the country where in this forum only emotional management of all the residents are being done .
